ULUNDI LOCAL MUNICIPALITY
ANNUAL FINANCIAL STATEMENTS
for the year ended 30 June 2012

Approval of annual financial statements

I am responsible for the preparation of these annual financial statements, which are set out on pages x to x, in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality. I certify that the salaries, allowances and benefits of Councillors, loans made to Councillors, if any, and payments made to Councillors for loss of office, if any, as disclosed in note 27 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

Municipal Manager: Princess SA Buthelezi

ULUNDI LOCAL MUNICIPALITY
Annual Financial Statements
SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
for the year ending 30 June 2012

1 BASIS OF ACCOUNTING

1.1 BASIS OF PRESENTATION

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise.

These annual financial statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

The accounting policies applied are consistent with those used to present the previous year's financial statements, unless explicitly stated. The details of any changes in accounting policies are explained in the relevant policy.

1.2 PRESENTATION CURRENCY

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.3 GOING CONCERN ASSUMPTION

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

1.4 COMPARATIVE INFORMATION

Budget information in accordance with GRAP 1 and 24, has been provided in an annexure to these financial statements and forms part of the audited annual financial statements.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has

1.5 STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET

The following GRAP standards have been issued but are not yet effective and have not been early adopted by the municipality:

GRAP 8 Interest in Joint Ventures - issued August 2006

GRAP 18 Segment Reporting - issued March 2005

GRAP 23 Revenue from Non-Exchange Transactions (Taxes and Transfers) - issued February 2008

GRAP 24 Presentation of Budget Information in Financial Statements - issued November 2007

GRAP 103 Heritage Assets - issued July 2008

The following standards, amendments to standards and interpretations have been issued but are not yet effective and have not been early adopted by the municipality:

IAS 19 Employee Benefits - effective 1 January 2009

IFRIC 17 Distribution of Non-cash Assets to Owners - effective 1 July 2009

2 PROPERTY, PLANT AND EQUIPMENT

2.1 INITIAL RECOGNITION

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

2.2 SUBSEQUENT MEASUREMENT - REVALUATION MODEL (LAND AND BUILDINGS)

Subsequent to initial recognition, land and buildings are carried at a revalued amount, being its fair value at the date of revaluation less any subsequent accumulated depreciation and impairment losses.

An increase in the carrying amount of an asset as a result of a revaluation is credited directly to a revaluation surplus reserve, except to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

A decrease in the carrying amount of an asset as a result of a revaluation is recognised in surplus or deficit, except to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

2.3 SUBSEQUENT MEASUREMENT - REVALUATION MODEL (LAND, BUILDINGS, and other infrastructure)

Subsequent to initial recognition, land, buildings, and other infrastructure assets are carried at a revalued amount, being its fair value at the date of revaluation less any subsequent accumulated depreciation and impairment losses.

An increase in the carrying amount of an asset as a result of a revaluation is credited directly to a revaluation surplus reserve, except to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

A decrease in the carrying amount of an asset as a result of a revaluation is recognised in surplus or deficit, except to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

Land is not depreciated as it is deemed to have an indefinite useful life.

2.4 DEPRECIATION AND IMPAIRMENT

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets *[or state other method used, e.g. production-unit- or diminishing balance method]*. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

Infrastructure		Other	
Roads and Paving	10-20	Buildings	30.00
Pedestrian Malls	30.00	Air Conditioners	7.00
Electricity	25.00	Vehicles and tractors	7.00
Water	20.00	Office equipment	5.00
Sewerage	20.00	Furniture and fittings	10.00
		Watercraft	
Community		Machinery and Equipmmy	7.00
Buildings	30.00	Tools	5.00
Recreational Facilities	10.00	Radio	5.00
		Computer equipment	3.00

The residual value, the useful life of an asset and the depreciation method is reviewed annually and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

- 2.5 The municipality tests for impairment where there is an indication that an asset may be impaired. An Items of Property, plant and equipment are derecognised when the asset is disposed of or when there

3 INTANGIBLE ASSETS

3.1 INITIAL RECOGNITION

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software, licences, and development costs. The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

3.2 SUBSEQUENT MEASUREMENT - COST MODEL

Intangible assets are subsequently carried at cost less accumulated amortisation and impairments. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

3.3 AMORTISATION AND IMPAIRMENT

Amortisation is charged so as to write off the cost or valuation of intangible assets over their estimated useful lives using the straight line method. The annual amortisation rates are based on the following estimated average asset lives:

Computer software

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at each reporting date and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

The municipality tests intangible assets with finite useful lives for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

3.4 DERECOGNITION

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

3 INVESTMENT PROPERTY

3.1 INITIAL RECOGNITION

Investment property includes property (land or a building, or part of a building, or both land or buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations.

At initial recognition, the municipality measures investment property at cost including transaction costs once it meets the definition of investment property. However, where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition.

The cost of self-constructed investment property is the cost at date of completion.

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

Investment property

3.2 SUBSEQUENT MEASUREMENT - FAIR VALUE MODEL

Investment property is measured using the fair value model. Under the fair value model, investment property is carried at its fair value at the reporting date. Any gain or loss arising from a change in the fair value of the property is included in surplus or deficit for the period in which it arises.

4 NON-CURRENT ASSETS HELD FOR SALE

4.1 INITIAL RECOGNITION

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

4.2 SUBSEQUENT MEASUREMENT

Non-current assets held for sale (or disposal group) are measured at the lower of carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

4 INVENTORIES

4.1 INITIAL RECOGNITION

Inventories comprise current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Where inventory is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

4.2 SUBSEQUENT MEASUREMENT

Inventories, consisting of consumable stores, raw materials, work-in-progress and finished goods, are valued at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. Redundant and slow-moving inventories are identified and written down in this way. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

In general, the basis of allocating cost to inventory items is the first-in, first-out method OR the weighted average method.

5 FINANCIAL INSTRUMENTS

5.1 INITIAL RECOGNITION

Financial instruments are initially recognised at fair value.

5.2 SUBSEQUENT MEASUREMENT

Financial Assets are categorised according to their nature as either financial assets at fair value through profit or loss, held-to-maturity, loans and receivables, or available for sale. Financial liabilities are categorised as either at fair value through profit or loss or financial liabilities carried at amortised cost ("other"). The subsequent measurement of financial assets and liabilities depends on this categorisation and, in the absence of an approved GRAP Standard on Financial Instruments, is in accordance with IAS 39.

5.2.1 INVESTMENTS

Investments, which include listed government bonds, unlisted municipal bonds, fixed deposits and short-term deposits invested in registered commercial banks, are categorised as either held-to-maturity where the criteria for that categorisation are met, or as loans and receivables, and are measured at amortised cost. Where investments have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified. Impairments are calculated as being the difference between the carrying amount and the present value of the expected future cash flows flowing from the instrument. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the Statement of Financial Performance.

5.2.2 TRADE AND OTHER RECEIVABLES

Trade and other receivables are categorised as financial assets: loans and receivables and are initially recognised at fair value and subsequently carried at amortised cost. Amortised cost refers to the initial carrying amount, plus interest, less repayments and impairments. An estimate is made for doubtful receivables based on a review of all outstanding amounts at year-end. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. Impairments are determined by discounting expected future cash flows to their present value. Amounts that are receivable within 12 months from the reporting date are classified as current.

An impairment of trade receivables is accounted for by reducing the carrying amount of trade receivables through the use of an allowance account, and the amount of the loss is recognised in the Statement of Financial Performance within operating expenses. When a trade receivable is uncollectible, it is written off. Subsequent recoveries of amounts previously written off are credited against operating expenses in the Statement of Financial Performance.

5.2.3 TRADE PAYABLES AND BORROWINGS

Financial liabilities consist of trade payables and borrowings. They are categorised as financial

6.2.4 CASH AND CASH EQUIVALENTS

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are

6 UNAUTHORISED EXPENDITURE

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

7 IRREGULAR EXPENDITURE

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

8 FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

9 PROVISIONS

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at reporting date and adjusted to reflect the current best estimate. Where the effect is material, non-current provisions are discounted to their present value using a pre-tax discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability (for example in the case of obligations for the rehabilitation of land).

The municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is probable.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

A provision for restructuring costs is recognised only when the following criteria over and above the recognition criteria of a provision have been met:

- the principal locations affected;
- the location, function, and approximate number of employees who will be compensated for terminating their services;
- the expenditures that will be undertaken; and
- when the plan will be implemented; and

(a) The municipality has a detailed formal plan for the restructuring identifying at least:

- the business or part of a business concerned;
- the principal locations affected;
- the location, function, and approximate number of employees who will be compensated for terminating their services;
- the expenditures that will be undertaken; and
- when the plan will be implemented; and

(b) The municipality has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

10 LEASES

10.1 MUNICIPALITY AS LESSEE

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the municipality. Property, plant and equipment or intangible assets subject to finance lease agreements are initially recognised at the lower of the asset's fair value and the present value of the minimum lease payments. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant, equipment or intangibles. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred. The accounting policies relating to derecognition of financial instruments are applied to lease payables. The lease asset is depreciated over the shorter of the asset's useful life or the lease term.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are accrued on a straight-line basis over the term of the relevant lease.

11 REVENUE

11.1 REVENUE FROM EXCHANGE TRANSACTIONS

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Service charges relating to electricity and water are based on consumption. Meters are read on a quarterly basis and are recognised as revenue when invoiced. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the recorded number of refuse containers per property.

Interest revenue is recognised on a time proportion basis.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Dividends are recognised on the date that the Municipality becomes entitled to receive the dividend.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant gazetted tariff. This includes the issuing of licences and permits.

Revenue from the sale of goods is recognised when substantially all the risks and rewards in those goods is passed to the consumer.

Revenue arising out of situations where the municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the municipality as compensation for executing the agreed services.

11.2 REVENUE FROM NON-EXCHANGE TRANSACTIONS

Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportionate basis.

Fines constitute both spot fines and summonses. Revenue from spot fines and summonses is recognised when payment is received, together with an estimate of spot fines and summonses that will be received based on past experience of amounts collected.

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, a deferred income (liability) is recognised.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the municipality.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

11.3 GRANTS, TRANSFERS AND DONATIONS

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

12 BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets are capitalised to the cost of that asset unless it is inappropriate to do so. The municipality ceases the capitalisation of borrowing costs when substantially all the activities to prepare the asset for its intended use or sale are complete. It is considered inappropriate to capitalise borrowing costs where the link between the funds borrowed and the capital asset acquired cannot be adequately established. Borrowing costs incurred other than on qualifying assets are recognised as an expense in surplus or deficit when incurred.

13 CONSTRUCTION CONTRACTS AND RECEIVABLES

Where the outcome of a construction contract can be estimated reliably, contract revenue and costs are recognised by reference to the stage of completion of the contract activity at the reporting date, as measured by *[the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs OR surveys of work done OR completion of a physical proportion of the contract work]*.

Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent that contract costs incurred are recoverable. Contract costs are recognised as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

14 IMPAIRMENT OF ASSETS

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash-generating unit to which the asset belongs is determined.

The recoverable service amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An impairment loss is recognised for cash-generating units if the recoverable service amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit as follows:

- to the assets of the unit, pro rata on the basis of the carrying amount of each asset in the unit.

A municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

3 Reconciliation of the doubtful debt provision

Balance at beginning of the year	31 662 373	33 511 857
Contributions to provision		
Adjustment for Debtors impairment	61 141 873.00	
Reversal of provision	(1 196 714)	(1 849 354)
Balance at end of year	91 607 532	31 662 503

The outstanding property rates balance included an amount of R 19 533 070 (2011 - R 17 727 510) in respect of the Ingonyama Trust Land. The recovery of these rates is uncertain and has been referred to Council to consider the write off thereof.

The provision for bad Debts relating to Rates , relates to the Land that was in the name of ITB , which is to be transferred back to the Municipality in terms the proclamation, therefore rates against these properties should have never been raised.

ULUNDI LOCAL MUNICIPALITY
Annual Financial Statements
NOTES TO THE FINANCIAL STATEMENTS
for the year ended 30 June 2012

Note 2012 2011

Trade and other receivables which are less than 3 months past due are not considered to be impaired. At 30 June 2012, R 3 893 832- (2011: R 3 616 764-) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	31-60	2 160 453	2 015 227
2 months past due	61-90	1 733 379	1 601 537
3 months past due		<u>3 893 832</u>	<u>3 616 764</u>

No government debts have been provided for in the above amount.

Trade and other receivables impaired

As of 30 June 2012, trade and other receivables of R 93 267 484 were impaired and provided for.

The ageing of these receivables is as follows:

Past due 3 months	1 659 950	1 645 074
Over 3 months past due	<u>91 607 534</u>	<u>97 307 253</u>
	<u>93 267 484</u>	<u>98 952 327</u>

The fair value of trade and other receivables approximates their carrying amounts.

4 OTHER RECEIVABLES FROM NON-EXCHANGE TRANSACTIONS

Other debtors	1 725 441	2 113 742
Total Other Debtors	<u>1 725 441</u>	<u>2 113 742</u>
Less: Provision for Doubtful Debts	<u>1 256 290</u>	<u>1 256 290</u>
	<u>469 151</u>	<u>857 452</u>

Municipal			
Total Property Valuations		2 190 290 000	2 190 747 211

Valuations on land and buildings are performed every four years. The latest valuation was completed on 1st January 2009, and came into effect on 1 July 2009.

A municipality must regularly, but at least once a year, update its valuation roll by causing-

- (a) a supplementary valuation roll to be prepared, if section 78 applies; or
- (b) the valuation roll to be amended, if section 79 applies.

78 Supplementary valuations

(1) A municipality must, whenever necessary, cause a supplementary valuation to be made in respect of any rateable property-

- (a) incorrectly omitted from the valuation roll;
- (b) included in a municipality after the last general valuation;
- (c) subdivided or consolidated after the last general valuation.

39.2 Operating leases

At the reporting date the entity has outstanding commitments under operating leases which fall due as follows:

Operating leases - lessee

Within one year	2 975 655	
Greater than one year	2 688 789	
Total	5 664 444	-

Operating Leases consists of the following:
Operating lease payments represent rentals payable by the municipality for certain of its office properties. Leases are negotiated for an average term of seven years and rentals are fixed for an average of three years. No contingent rent is payable

ULUNDI LOCAL MUNICIPALITY
NOTES TO THE FINANCIAL STATEMENTS
for the year ended 30 June 2012

Note 2012 2011

40 PENSION FUND INFORMATION

40.1 Defined contribution plan

Certain Councilors and employees belong to defined benefit retirement funds administered by the Natal Joint Municipal Pension Fund. These funds are subject to a triennial actuarial valuation. The last valuation was performed in 2009.

41.2 Retirement Fund

The Fund's Actuary confirmed that, at the valuation date,
- the Memorandum account was fully funded

- the Fund's liabilities for members exceeded the value of the assets, however, it was anticipated that the surcharge of 17 % of pensionable salaries, which currently applies, will enable the shortfall to be eliminated by July 2010.

CERTIFICATE AS ISSUED BY VALUATOR ACTUARY

We have reconciled the valuation data with the financial statements and performed a number of reasonableness tests to verify the correctness of the data. I am satisfied with the accuracy of the data for purposes of this valuation.

I am satisfied that the asset composition on the valuation date is appropriate to the nature of the liabilities.

The Fund self-insures its risk benefits. The lump sum element of these benefits is relatively small, with the major element comprising of annuity payments. I am satisfied that the self-reinsurance arrangement is appropriate for the Fund.

At the valuation date:

The Memorandum Account in respect of pensioners was fully funded;

Based on the valuation assumptions that applied in 2000, the Fund was fully funded.

However, based on the revised assumptions, the Fund's liabilities for the Members exceeded the value of the assets and an extension of the surcharge for another 5 years will be necessary to return the funding level of the Fund to 100%.

The position will be reviewed at the next interim valuation of the Fund as at 31 March 2010.

AR ELS (FASSA FIA) S HEYNEKE (FASSA FIA)
VALUATOR ACTUARY

In my capacity as valuator to the Fund and as in my capacity as actuary and as an employee of Arthur Els & Associates employee of Arthur Els & Associates

	Note	2012	2011
41 CONTINGENT LIABILITY			
41.1 Claim for damages			
The following matters are currently on the roll of the high court and as at balance sheet date the following amounts represent possible liabilities, they are an estimate from the Municipality's attorneys.			
D.N. Nzimande on behalf of S.E. Nzimande vs Ulundi Municipality		6 000 000	2 300 000
G.M. Zondo on behalf of L.Z. Zondo vs Ulundi Municipality		3 000 000	100 000
The Municipality is being sued by these ratepayers for damages arising from incidents relating to electric shock injuries sustained.			
		<u>9 000 000</u>	<u>2 400 000</u>
This matter will be arbitrated upon. It has not reached the arena of court. The current amount being claimed, for services rendered is in the region of R540 000-00. It is for the services of speed cameras and equipment supplied to Ulundi.			
Municipality is being sued. The basis of the action is that the Municipality failed to take delivery of motor vehicles that they ordered in terms of a tender process. The Municipality is alleging that the motor vehicles were returned, after the service provider failed to adhere to the specifications and a notice of cancellation was given.			
		11 000 000	
The arbitrator will find that the Municipality will have to pay the full amount outstanding together with costs. This will be estimated to be R500 000-00. (the claim plus costs)			
		<u>500 000</u>	<u>600 000</u>
		<u>20 500 000</u>	<u>3 000 000</u>

42 RELATED PARTIES

Compensation paid to members of key management

Compensation paid to councillors

There were no related party transactions during the 2010/2011 financial year.

46 RISK MANAGEMENT

46.1 Maximum credit risk exposure

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or consumer contract, leading to financial loss. The municipality is exposed to credit risk from its operating activities (primarily for trade receivables)

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluates credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assess

100 527 055 105 551 055

Credit risk from balances with banks and financial institutions is managed by the municipality's finance and management committee in accordance with the municipality's policy. Investments of surplus funds are made only with approved counterparties and with

Counterparty credit facilities are reviewed by MANCO on an annual basis , and may be updated throughout the year subject to approval by EXCO.

Financial assets exposed to credit risk at year end were as follows:

First National Bank Call Investments

129 853 134 528

These balances represent the maximum exposure to credit risk.

ULUNDI LOCAL MUNICIPALITY
NOTES TO THE FINANCIAL STATEMENTS
for the year ended 30 June 2012

Note 2012 2011

46.2 Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities. Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

46.3 GOING CONCERN

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

Immediate indication of going concern problems include: Cash book overdraft; Unspent conditional grants and consumer deposits not cash backed; disclosed operating deficit; and over spend on budget.

The physical bank account never went into overdraft, the un-presented cheques, were subsequently covered by deposits.

As disclosed in note 1, the unspent grants and consumer deposits were not cash backed. The main reason for this was due to collection challenges experienced with a number of major clients, and legal proceedings have been commenced on collection.

Unspent Grants balance	11 917 002	5 216 036
Consumer Deposits - Electricity	1 485 904	1 369 288
	<u>13 402 906</u>	<u>6 585 324</u>

The municipality has adopted a cash flow turnaround strategy which included amongst other things:

Development and implementation of a cash flow management policy, which includes the creation of a cash flow management committee, chaired by the municipal manager, this committee sits every Friday of each week. The mayor and deputy also sits in this committee for oversight.

The municipality has engaged the ITC Transunion to assist with the cleansing of debtors and updating contact details of the debtors. This will assist in arriving at a reliable provision for bad debts.

The municipality has also centralised expenditure prioritisation to the cash flow management committee where upon the expenditure is scrutinised before it is incurred.

The municipality has also established an adhoc electricity disconnections and meter auditing committee, chaired by the deputy CFO, this committee sits every Monday. This is done to enhance revenue collection and additional six meter auditors including the liaison officer has been appointed to fast track the disconnections and meter auditing.

The municipality has appointed an expert in electrical engineering to investigate the commercial conventional meters in the CBD areas. This will address the standardisation of the types of meters installed and ensure that the meters billed correctly.

The municipality is in negotiation with ESKOM with a view to transfer industrial customers to the municipality with a view to enhance municipal revenue.

NERSA has approved that the municipality charges low and high demand charges to its commercial customers which going to reduce the seasonal high demand charge by ESKOM, however the timing difference between the start of our financial year and that of ESKOM still remains a challenge.

46.4 Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

47 COMPARISON WITH THE BUDGET

The comparison of the Municipality's actual financial performance with that budgeted is set out in Annexures E(1) and E(2)
